NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED

(Tabular amounts in thousands of United States dollars, except per share amounts)

1. NATURE OF OPERATIONS AND CORPORATE INFORMATION

Adventus Mining Corporation ("Adventus" or "the Corporation") is a mineral exploration and development company that is focused on the identification and acquisition of mineral properties and the exploration and development of its mineral properties. It is presently funding exploration and development expenditures in the Curipamba property ("Curipamba") in Ecuador under an option agreement ("Option Agreement") to earn an interest in Curipamba as well as in other exploration properties in Ecuador under an exploration alliance agreement ("Alliance Agreement") with Salazar Resources Ltd ("Salazar").

The Corporation was incorporated on October 24, 2016 pursuant to the Canada Business Corporations Act. Its registered office is at 550-220 Bay Street, Toronto, ON, M5J 2W4. It is listed on the TSX Venture Exchange under the symbol ADZN and trades on the OTCQX under the symbol ADVZF.

The Corporation's condensed consolidated financial statements were authorized for issue by the Board on August 24, 2021.

2. BASIS OF PRESENTATION

These condensed consolidated financial statements have been prepared in accordance with International Accounting Standards ("IAS") 34, *Interim Financial Reporting* using the same accounting policies and methods of computation as the Corporation's most recent annual consolidated financial statements. These condensed consolidated financial statements should be read in conjunction with the annual consolidated financial statements for the year ended December 31, 2020, which have been prepared in accordance with International Financial Reporting Standards ("IFRS").

These condensed consolidated financial statements have been prepared on a historical cost basis, except for certain items at fair value. Additionally, these condensed consolidated financial statements have been prepared using the accrual basis of accounting, except for cash flow information. All amounts are expressed in United States dollars, unless otherwise stated. Tabular amounts are presented in thousands of United States dollars with the exception of per share amounts.

Going concern

These condensed consolidated financial statements have been prepared on a going concern basis. In making the assessment that the Corporation is a going concern, management has considered all available information about the future, which is at least, but not limited to, the twelve months from June 30, 2021.

As at June 30, 2021, the Corporation has approximately \$10,607,000 in cash and cash equivalents (December 31, 2020: \$21,618,000), with \$8,099,000 in working capital (December 31, 2020: \$21,148,000). The Corporation reported net loss attributable to common shareholders of \$548,000 for the six months ended June 30, 2021 (June 30, 2020: \$1,950,000). The ability to continue operations in the normal course of business is dependent on several factors, including the Corporation's ability to secure funding.

The recoverability of the amount capitalized to exploration and evaluation assets and to the options to acquire shares in mineral interests is dependent upon the existence of economically recoverable reserves, the ability of the Corporation to obtain financing on favourable terms to continue to perform exploration activities or complete the development of the properties where necessary, or alternatively, upon the Corporation's ability to recover its incurred costs through a disposition of its interests, all of which are uncertain. These uncertainties may affect the ability of the Corporation to continue operations and meet its obligations and discharge its liabilities into the foreseeable future as a going concern and, accordingly, the ultimate appropriateness of the use of the accounting principles applicable to going concern.

The Corporation has been able to raise adequate funding for its operations in the past. On August 14, 2020, the Corporation closed a previously announced bought-deal prospectus financing ("Offering"), pursuant to which a consortium of underwriters (the "Underwriters") agreed to purchase from the Corporation 27,559,100 common shares in the Corporation at a price of C\$1.27 per share ("Offering Price") for aggregate gross proceeds of approximately \$26,415,000 (C\$35,000,000). On September 3, 2020, the Underwriters exercised their over-allotment option and purchased an additional 2,337,911 common shares at the Offering Price, for aggregate gross proceeds of approximately \$2,263,000 (C\$2,969,000).

While the Corporation has been successful in raising equity financing as required and at June 30, 2021, had \$10,607,000 in cash and cash equivalents, events or circumstances could arise that may limit the ability of the Corporation to raise funds in a timely manner. As such, management believes that material uncertainties remain, which may cast significant doubt upon the Corporation's ability to continue as a going concern. Management continues to explore all available options to secure funding, including equity financing and strategic partnerships. Should the Corporation not be able to secure financing in a timely manner, the Corporation will curtail exploration spending and defer discretionary expenditures to conserve cash.

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITEI

(Tabular amounts in thousands of United States dollars, except per share amounts)

2. BASIS OF PRESENTATION (CONTINUED)

Following the World Health Organization's declaration of the outbreak of the novel coronavirus, COVID-19, a global pandemic in March 2020, public health safety measures were put in place by most of the world's nations, and certain mobility restrictions were imposed by various countries. This included countries in which the Corporation operates. As a result, the Corporation suspended site activities from mid-March 2020, while desktop studies and office work continued offsite. Activities gradually restarted from mid-2020 and in 2021, work proceeded relatively uninterrupted and the overall impact on the Corporation to date has not been material. Whether there will be a significant impact in 2021 is dependent on whether there will be further spike in infection, the spread of the virus, in particular the variants, the timely rollout of the vaccines and their effectiveness in managing the spread, the lifting of mobility restrictions, the recovery of the global economy and the volatility of the commodity markets, all of which are uncertain and may impose significant negative impact on the operations of the Corporation and its cash flow.

These condensed consolidated financial statements do not include any additional adjustments to the recoverability and classification of certain recorded asset amounts, classification of certain liabilities and changes to statement of earnings (loss) and comprehensive earnings (loss) that might be necessary if the Corporation was unable to continue as a going concern.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, JUDGMENTS AND ESTIMATES

The accounting policies, judgments and estimates applied in the Corporation's condensed consolidated financial statements are consistent with those of the annual consolidated financial statements as at and for the year ended December 31, 2020, except as noted below.

These condensed consolidated financial statements include all material subsidiaries in the accounts of the Corporation for the periods presented. These subsidiaries are listed as follows:

Subsidiary	Ownership	Incorporated	Nature
Adventus Zinc Ireland Limited	100%	Ireland	Mineral exploration
Dos Gemas Company M2G S.A.	80%	Ecuador	Mineral exploration
Guayacán Gold GGC S.A.	80%	Ecuador	Mineral exploration
Llaktawayku S.A.	80%	Ecuador	Mineral exploration

Investment in associates

Investment in associates over which the Corporation exercises significant influence are accounted for using the equity method, whereby the investment is initially recognized at cost and adjusted thereafter for the Corporation's share of change in net assets of the investee post-acquisition, while including its share of the investee's profit or loss in the Corporation's profit or loss and the investee's other comprehensive loss is included in the Corporation's other comprehensive loss. At each reporting date, the Corporation determines if there is objective evidence of impairment as a result of one or more loss events and where that exists, the Corporation will record an amount of impairment charge in its profit or loss for the period in the statements of earnings (loss).

Where an impairment subsequently reverses, the carrying amount is increased to the revised estimate of recoverable amount but only to the extent that this does not exceed the carrying value that would have been determined if no impairment had previously been recognized. A reversal is recognized as an impairment reversal for the period in the statements of earnings (loss).

New accounting standards

Amendment to IAS 1 – Presentation of Financial Statements: In January 2020, the International Standards Accounting Board ("IASB") issued an amendment that affect the presentation of liabilities in the statement of financial position, clarifying that one of the requirements for the classification of a liability as non-current under the standard is the right of the entity to defer settlement of the liability for at least 12 months after the reporting period and that such right should exist at the end of the reporting period. This amendment is effective for annual periods beginning on or after January 1, 2023, with earlier application allowed. The Corporation is currently evaluating the potential impact of these amendments on its financial statements.

Amendment to IAS 12 – Income Taxes: In May 2021 the Board issued Deferred Tax related to Assets and Liabilities arising from a Single Transaction. The amendments narrowed the scope of the recognition exemption in paragraphs 15 and 24 of IAS 12 (recognition exemption) so that it no longer applies to transactions that, on initial recognition, give rise to equal taxable and deductible temporary differences. The amendments are effective for annual reporting periods beginning on or after January 1, 2023. Early adoption is permitted.

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED

(Tabular amounts in thousands of United States dollars, except per share amounts)

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, JUDGMENTS AND ESTIMATES (CONTINUED)

An entity applies the amendments to transactions that occur on or after the beginning of the earliest comparative period presented. It also, at the beginning of the earliest comparative period presented, recognizes deferred tax for all temporary differences related to leases and decommissioning obligations and recognizes the cumulative effect of initially applying the amendments as an adjustment to the opening balance of retained earnings (or other component of equity, as appropriate) at that date. The Corporation is evaluating the amendment and does not expect any material impact to the financial statements upon adoption in the future.

Amendment to IAS 16 – Property, Plant and Equipment: In May 2020, IASB issued a narrow-scope amendment regarding proceeds from selling items produced while bringing an asset into the location and condition intended to by management. The amendment prohibits entities from being able to deduct such proceeds from the cost of the item of property, plant and equipment and instead requires the proceeds from such sales and the cost of producing those items to be recognized in profit or loss. The amendment is effective for annual periods beginning on or after January 1, 2022, with earlier application permitted. The Corporation continues to evaluate the amendment and does not expect any material impact to the financial statements upon adoption in the future.

4. INVESTMENT IN ASSOCIATE

The Corporation owns approximately 20.07% (December 31, 2020: 23.86%) of common shares in Canstar and accounts for its investment in Canstar using the equity method. In 2020 and in May 2021, Canstar closed several private placements in which the Corporation did not participate and recorded dilution gain on investment. The May 2021 private placement undertaken by Canstar and the continuing increase in Canstar's share price above the price at which the Corporation made its initial investment, as well as the status of the underlying projects and their related funding requirements, were deemed by management to indicate that the conditions for the previous impairments no longer existed. As at June 30, 2021, the Corporation determined the recoverable value of its investment in Canstar and recorded a \$1,253,000 impairment reversal. The recoverable amount of the Corporation's investment in Canstar was based on the fair value less costs of disposal. As a result, the carrying amount of the investment in Canstar was \$2,276,000 as at June 30, 2021 (December 31, 2020: \$1,094,000). On July 8, 2021, the Corporation agreed to sell its 17,336,339 shares in Canstar at C\$0.375 per share for gross proceeds of approximately \$5,171,000 (C\$6,501,000).

5. INVESTMENT

In 2019, the Corporation had divested some properties in Ireland in return for common shares in BMEx Limited ("BMEx"), a company incorporated in Australia. Following an unsuccessful attempt to list on the Australian Securities Exchange and due to volatility in the capital markets resulting from COVID-19, management has determined that it is not likely that BMEx will obtain adequate financing for its operations, and hence a full impairment charge of \$162,000 is recorded against its investment in BMEx in the quarter ended March 31, 2020.

The Corporation acquires exploration and evaluation assets through staking and from third party vendors and may sell some or a portion of its exploration and evaluation assets in exchange for exploration expenditures, royalty interests, cash and share-based payments.

During the six months ended June 30, 2021, the Corporation invested \$10,048,000 (June 30, 2020: \$4,290,000) in the option to earn into the entity that holds the Curipamba mining interest. As at June 30, 2021, the Corporation had funded a cumulative amount of \$38,892,000 (December 31, 2020: \$28,844,000) of the \$25,000,000 Qualifying Project Expenditures required over five years to earn the option in Curipamba. The remaining obligation for the earn-in is the completion of the feasibility study, which is expected by the end of 2021. During the six months ended June 30, 2021, the Corporation invested \$1,282,000 (June 30, 2020: \$507,000) and \$522,000 (June 30, 2020: \$143,000) respectively into Pijilí and Santiago. The carrying value of Pijilí and Santiago at June 30, 2021 is \$9,735,000 (December 31, 2020: \$8,453,000) and \$3,197,000 (December 31, 2020: \$2,675,000) respectively.

On January 13, 2020, the Corporation entered into the South32 Agreement to advance the Rathkeale, Kingscourt and Fermoy projects (the "Irish Projects") in the Limerick Basin in the Republic of Ireland. The Irish Projects are owned by Adventus Ireland. The South32 Agreement grants South32 Ireland the right to acquire a 70% interest in the Irish Projects by funding €3,500,000 in exploration on the Irish Projects over a four-year period. Adventus Ireland will operate the exploration activities during the earn-in period. On March 24, 2020, Adventus Ireland received approval for the earn-in agreement and funding arrangements from the Department of Communications, Climate and Environment in the Republic of Ireland. Pursuant to the South32 Agreement signed on January 13, 2020 with South32 Ireland, work continued the South32 Earn-In Projects with funding from South32. As at June 30, 2021, South32 has funded \$2,048,000 (€1,730,000) of the South32 Earn-In Projects.

As of June 30, 2021, the Corporation has included in its accounts payable an amount of \$516,000 attributable to exploration and evaluation asset expenditures as well as expenditures for the option to acquire mineral interest (December 31, 2020: \$479,000).

8. ADVANCES, OTHER RECEIVABLES AND PREPAID EXPENSES

Advances represent amounts in relation to the option to acquire mineral interests that have been advanced to Salazar for project expenditures in Curipamba but have not been spent. No interest is receivable on the advances. Other receivables include interest receivable, deposits with suppliers, deferred share issuance costs, sales tax recoverable from the government and other prepaid expenses.

During the six months ended June 30, 2021, 25,000 RSUs were forfeited and the Corporation recorded share-based compensation expense of \$193,000 (June 30, 2020: \$151,000) relating to RSUs. Subsequent to June 30, 2021, vesting for 455,000 RSUs has been extended from the original vesting date of July 12, 2021 as it fell within a blackout period.

(d) Net earnings (loss) per share

Basic and diluted net earnings (loss) per share were calculated using the weighted average number of common shares for the respective periods. The diluted net earnings (loss) per share was calculated using the weighted average number of common shares outstanding for the respective periods after giving effect to dilutive stock options and RSUs. For loss periods, the diluted net earnings (loss) per share was calculated using weighted average number of common shares outstanding for the respective periods without giving effect to dilutive stock options and RSUs since their inclusion would be anti-dilutive.

These transactions are in the normal course of operations and are measured at the fair value amount, which is the amount of consideration established and agreed to by the related parties.

11. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

Financial instruments recorded at fair value on the condensed consolidated statements of financial position are classified using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

Level 1 – valuation based on quoted prices (unadjusted) observed in active markets for identical assets or liabilities;

Level 2 – valuation techniques based on inputs that are quoted prices of similar instruments in active markets; inputs other than quoted prices used in a valuation model that are observable for that instrument; inputs that are derived principally from or corroborated by observable market data by correlation or other means; and estimates of expected volatility, expected life and expected risk-free rate of return, and;

Level 3 – valuation techniques with significant unobservable market inputs. Management assessed that the fair values of cash and cash equivalents, other receivables and advances, accounts payables and accruals, and other investment approximate their carrying amounts, largely due to the short-term maturities of these instruments.

13. COMMITMENTS

Mineral property expenditures

The Corporation has obtained various mineral rights licenses by staking claims and paying refundable security deposits. Certain expenditures are required on an annual basis, from the date of license issuance, to maintain the licenses in good standing and for refund of security deposits.

Ireland

In Ireland, on or before the anniversary date of license issuance, and if the required expenditures are not met, the Corporation has the option of reducing claims on a property, posting a refundable security bond for the deficient amount or elect to allow title of the license be cancelled. The Corporation is required to spend \$197,000 (€166,000) by December 31, 2021 and \$160,000 (€135,000) by December 31, 2022 in Ireland to maintain various licenses in good standing.

Ecuador

In Ecuador, for concessions applied through the public tender process, an investment offer is presented for each concession, the offer of which represents the total amounts required to be spent in order to maintain possession of the concession area at the end of the four-year investment period. For concessions not acquired through the public tender process or for concessions acquired through the public tender process and have fulfilled the initial investment conditions, the Corporation is required to submit an annual expenditure plan specifying its minimum amount of committed expenditures for the upcoming year.
